CyberSafely.ai Is Pleased to Welcome Jess Levy, MD. to Our Board of Advisors as Mental Health Advisor.

Highland Heights, Ohio, January 16, 2024 Dr. Jess Levy is a psychiatrist in Northeast Ohio. His psychiatric service includes children, adolescents, and adult patients. He is the proud owner of A+ Psychiatry, which specializes in outpatient treatment for patients with complex presentations, and he has expertise in treating ADD/ADHD. Dr. Levy is committed to empowering patients to unlock their inner genius. He believes that when people have the ability to succeed, they will succeed. Dr. Levy has a passion for teaching. He has and has twice been awarded Cleveland Clinic Division of Child and Adolescent Psychiatry Fellowship Teacher of the Year (2018, 2020), and awarded Teacher of the Year by Fellows at Akron Children's Hospital Department of Child and Adolescent Psychiatry in 2022. He is also professional member of the American Academy of Child and Adolescent Psychiatry.

Dr. Levy is interested in all things tech-related, including opportunities for improving mental health, as well as the risks at the individual and population levels. He strongly believes that Cybersafely.ai can have a positive impact in assisting parents and their children in managing that concern.

CyberSafely.ai is a web-based alert system designed to scan students' social media accounts for pictures, phrases, and words that may cause harm or suggest that there is a potential issue. With Dr. Levy's experience hearing from parents that they believe social media is a liability for their children, and his dedication to working with individuals and families to create systems to keep a person on the right track, makes him an ideal medical liaison for the CyberSafely.ai Board of Advisors.

“CyberSafely.ai is a 21st-century solution to a 21st-century problem. For better and for worse, social media is synonymous with youth culture. We as mental health professionals, parents, and educators need to be up to the task of helping young people engage responsibly with social media.”

CyberSafely.ai is honored to add Dr. Levy to our team as our Mental Health Advisor. He will help us better understand the problems today’s children are facing, so we can enhance our software to help them. He will become a participant in our monthly forum for parents and school administrators, as well as help us to further develop the Resources section of our website to help parents understand today’s issues. As we all know “It Takes a Village” to raise a child. We are proud to welcome Dr. Levy as the newest member of our Village.

About CyberSafely.ai

CyberSafely.ai is a web-based, artificial intelligence scanning system developed to increase student safety on social media. When the AI identifies a potential issue, it determines the level of urgency. It sends an alert to the parents and any other pre-determined advisors who can determine if further action needs to be taken. Critical posts are taken down immediately by the system.
